

## air distributors with airflow balancing system

2nd generation ventilation air distribution system. 1st on the market.

IPX-PREMIUM by Inwest-Produkt is a complete hybrid air distributor ventilation system equipped with specially developed connectors for corrugated flexible ducts. These connectors are made of a specially developed mix of materials which is **weatherproof** with UV protection, **flexible** even in low temperature, with high resistance to many chemical agents. No odor, no-ageing, recyclable. **Compatible** with most corrugated pipes on market.

The IPX-PREMIUM connectors are **structurally equipped with 2 gaskets built-in**, thanks to this they are self-sealing and do not require the use of additional gaskets for the pipe. The system has **high tightness class** and provide easy and quick mounting. System is available in **4 diameters**: Ø50, Ø63, Ø75 and Ø90mm. Boxes and distributors are made of steel with **high density zinc layer** (275 g/m<sup>2</sup>) and they have many innovative solutions. Their steel connectors have additional sealing between box body and connector for **extra tightness**.

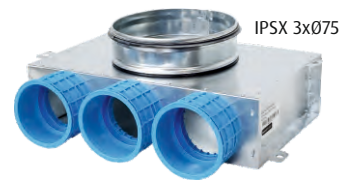

All 2-row air-distributors are **openable** for inspections and equipped with **perforated plate** that makes **airflow balanced**. Air distributor boxes may be insulated inside / outside or inside and outside with **insulation** that have protection against the growth of fungi and bacteria. IPX-PREMIUM system ensures low airflow resistance, which ensures **low energy consumption**.

AIR BOXES FOR BUILDINGS IN DRYWALL OR CANADIAN SYSTEM

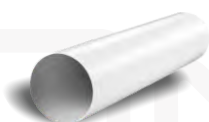

For wall mounting in drywall or frame buildings, use special boxes.

top view

A practical solution for applications in Canadian type construction. Wide fixings make it easy to install air box. Very short the air valve connector (13mm). Adapted to the thickness of plasterboards.

IZOLw - inner insulation 3mm made of rubber with closed cells. IZOLw/z - inner 10mm & outer 10mm insulation made of rubber with closed cells.

IP STANDARD version (steel connectors Ø63, Ø75, Ø90 ) and IP PLUS version (rubber connectors Ø50, Ø63, Ø75, Ø90) - prices are the same as IPX-PREMIUM version.

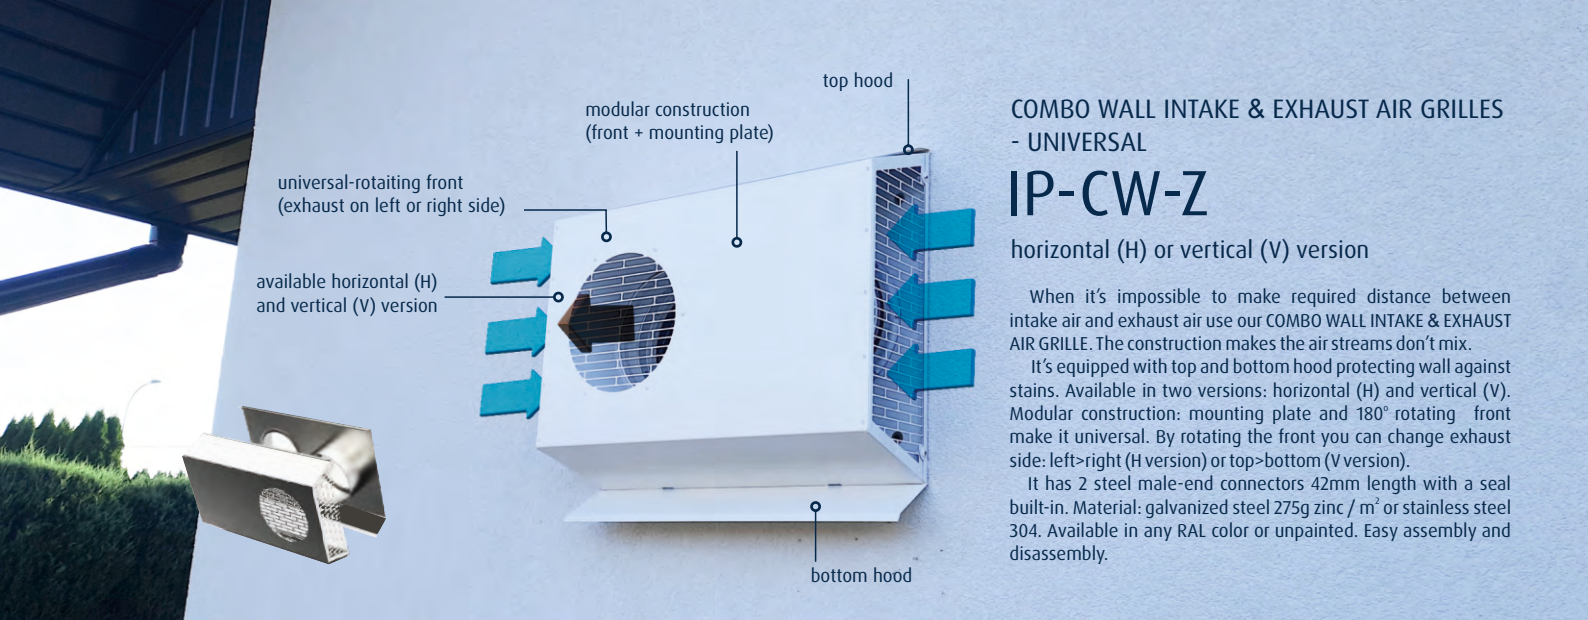

\* Insulation products have protection against the growth of fungi and bacteria. The products have a hygiene certificate that allows their use in the food industry.

## COMBO WALL INTAKE & EXHAUST AIR GRILLES - UNIVERSAL

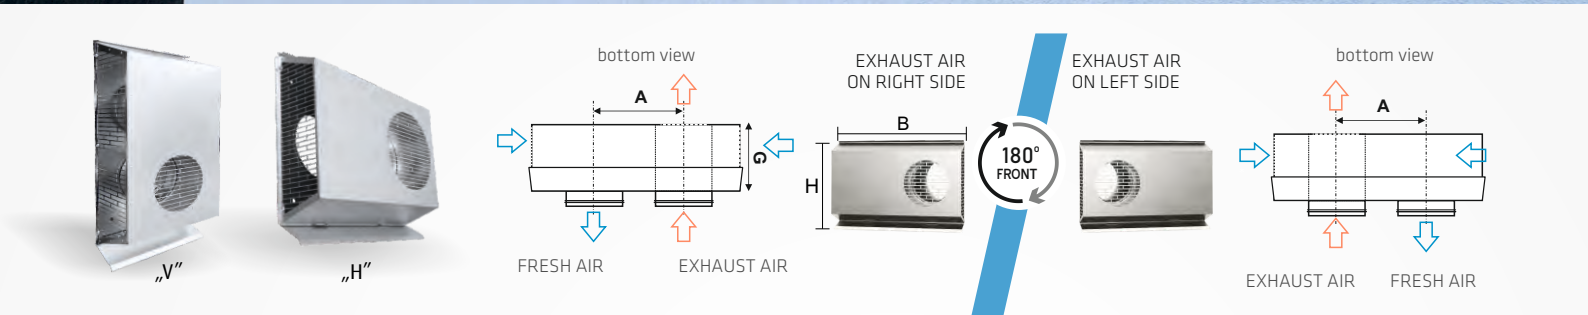

# IP-CW-Z

horizontal (H) or vertical (V) version

When it's impossible to make required distance between intake air and exhaust air use our COMBO WALL INTAKE & EXHAUST AIR GRILLE. The construction makes the air streams don't mix.

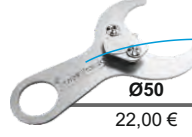

It's equipped with top and bottom hood protecting wall against stains. Available in two versions: horizontal (H) and vertical (V). Modular construction: mounting plate and 180° rotating front make it universal. By rotating the front you can change exhaust side: left-right (H version) or top-bottom (V version).

It has 2 steel male-end connectors 42mm length with a seal built-in. Material: galvanized steel 275g zinc / m<sup>2</sup> or stainless steel 304. Available in any RAL color or unpainted. Easy assembly and disassembly.
